AIR FIT soft body

The JVC original AIR FIT soft body puts JVC one step ahead in comfort with its uniquely designed secure fit shape and soft silicon rubber earpiece that contains air.

The AIR FIT soft body realises the ideal comfort while on-the-go:

- **No “fall-out” design**

The AIR FIT soft bodies change their shape according to the contours of the ear, ensuring that the ear phones will not fall out easily

- **Soft to the touch**

Thanks to the use of soft silicon material containing air around the headphone unit

These two models are both equipped with AIR FIT soft body

HA-FX1000

High grade in-ear canal headphones “Bi-METAL”

Bi-METAL
STRUCTURE

JVC
The Perfect Experience

Package Design

Concept

World's first headphones with wood dome diaphragms for enhanced sound quality

Main Features

- Manufactured using JVC's advanced thin film processing technology, the wood dome diaphragms used in the HA-FX1000 reproduce natural sound
- Wood housing creates tonal characteristics similar to that of a musical instrument
- A high-specific gravity brass ring on a steel unit base forms the Bi-METAL structure which controls movement of the diaphragm (please refer to page 11)
- One pair of memory foam and three sizes of silicon eartips ensure a comfortable and customised fit
- Supplied with a 2.62ft (0.8m) friction noise reduction cord and a 2.30ft (0.7m) extension cord
- Genuine leather carrying case included
- Gold-plated iPhone-compatible plug

iPhone, iPod, iPod classic, iPod nano, iPod shuffle, and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries. iPad is a trademark of Apple Inc.

● **Availability : Current**

Special technology for HA-NC250

Technology to block noise

Sound-insulating ear pads

Soft memory foam cushions with extremely smooth surface ear pads that fit exactly on your ears create a seal to block background noise.

Dual housing structure

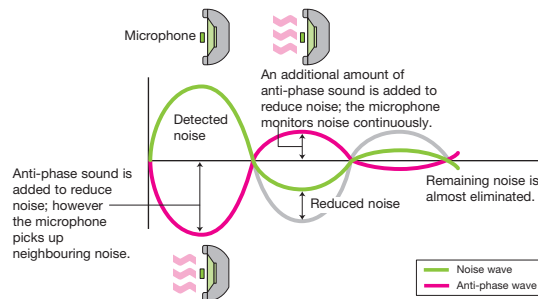

Dual acoustic wall blocks incoming background noise.

Technology to reduce noise

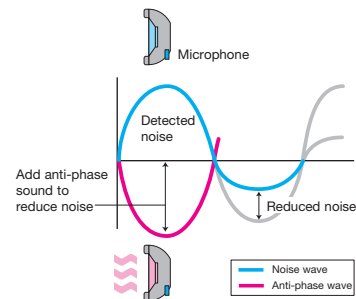

Equipped with advanced noise cancellation technology

Even after reducing background noise, some will remain. A microphone close to the driver unit picks up such remaining noise and the feedback circuit produces the appropriate amount of additional anti-phase sound. Every nuance of audio becomes clear through this feedback technology.

● Advanced noise cancelling with “feedback technology”

● Standard noise cancelling

Ring port structure

With the newly developed “Ring port structure”, the high sound quality available from digital audio can be fully realised, from powerful bass to the subtle high frequencies.

RING PORT STRUCTURE

With a ring port structure's sound ports located in a circle behind the driver unit, the sound pressure in headphone housing is equalised, realising stable amplification in the unit as a whole.

SOUND-INSULATING EAR PADS

Provide excellent sound insulation along with a comfortable fit

OFC CORD

Minimises the transmission loss with pure copper wire

CARBON COMPOUND DIAPHRAGM

Provides natural sound and highly realistic sensation
